DETAILED ACTION

Allowable Subject Matter

Claims 21-35 are allowed.

Reason for Allowability

The following is an examiner's statement of reasons for allowance: in combination with other limitations recited in the claims, the primary reason for the allowance is the including the following inventive features of a wedge including an axially extending wall (202), a first and a second side walls (104, 106) and a first and a second end walls, the side walls (104, 106) extending radially from and integrally formed with the axially extending wall (202), and the first and second end wall formed at the first and second ends (112) integrally with the axially extending wall (202) and the side walls (104, 106); a plurality of cavities (108) formed between the first and second ends of the wedge; and first and second radial member (112) extending axially from and integrally formed as part of the first and second end walls respectively.

Comparing to the prior-art of the record, JP-55-63530 discloses a wedge having coil brackets (1) connecting with pieces (4) forming the cavities therebetween but fails to disclose the wedge having an axially extending wall, or the first and second radial member extending axially from and integrally formed as part of the first and second end walls respectively.

Thus, none of the prior art references of the record, either stand-alone or in combination, has taught or suggest the above-mentioned features in combination with other limitations recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
